

**June 15th, 2010**

The District of Summerland in partnership with the Canada-British Columbia Municipal Rural Infrastructure Fund Program and the Ministry of Community Development in BC is pleased to announce that construction has now been completed, ***with the exception of water metering.***

The first phases of the work consisted of twinning water mains and upgrading the pump stations in the Prairie Creek area of Summerland. H & M Excavating of Penticton and Western Industrial Contracting of Penticton were the two prime contractors on the project. These two contractors have totally performed their work and the contracts are now in the warranty period.

Design works are now underway for the next phase of system separation.

Thanks

Brent Voss, ASCT
