How to Make Cleaning Products Using Apple Cider Vinegar

Ingredients - 1 part apple cider vinegar, 9 parts water so measurements of parts can vary depending on how much you want. We used 1 cup of vinegar to 9 cups of water, to make a mass amount. To make enough for 1 bottle is about $\frac{1}{3}$ a cup to 3 cups water.

Step 1: Measure apple cider vinegar, then pour into a mixing bowl.

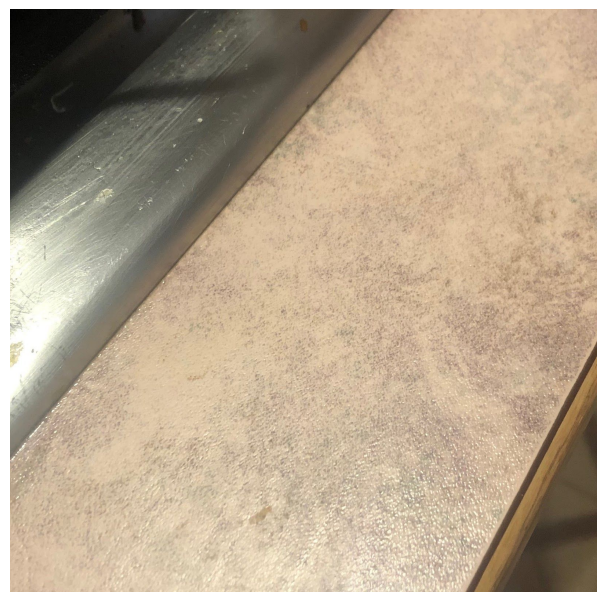

Step 2: Measure 9 parts water

Step 3: Add water to apple cider vinegar

Step 4: Put your water and vinegar mixture into a spray bottle and shake to thoroughly mix

OPTIONAL: add essential oils to make it smell nice :)
