Property Owner/Agent/Applicant

# OWNER'S ACKNOWLEDGMENTS, RELEASE, AND INDEMNIFICATION

The undersigned acknowledges the following:

Issuance of a permit pursuant to this application will not relieve me from my primary responsibility for complying with the federal, provincial and municipal regulations governing the work authorized by the permit, including the BC Building Code and the Municipality's bylaw, nor from the responsibility for obtaining information about such regulations, whether the work is undertaken by me or those whom I may retain or employ to provide design or construction services.

Construction must be carried out in accordance with the permit and all applicable laws, and in accordance with good construction practices.

It is my responsibility to establish the legal boundaries of the building lot and, unless the Building Official deems it unnecessary, to provide the Municipality a building survey certificate prepared by a BC Land Surveyor after the building foundations have been constructed.

Issuance of a permit does not entitle me to construct anything on the building lot in contravention of any covenant, easement, right of way, statutory building scheme, or other restriction or charge registered against title to the land, responsibility for the identification and interpretation of which rests wholly with me.

I am responsible for requesting inspections by the Municipalities Building Official at the following stages of construction, unless field reviews are being provided by a registered professional: footings and foundation framework; perimeter drainage and damp proofing before backfilling; water, sewage, and storm drainage connections before backfilling; framing; plumbing; insulation & vapour barrier; and final inspection.

I will be liable to the Municipality for the cost of repairing any damage to public works or highways that results from the construction authorized by the permit.

If the project involves any plumbing work, other than the repair or replacement of a valve, faucet, sprinkler, the clearance of a stoppage, or repair of a leak, requiring in each case no change in piping, a separate permit is required.

Neither the issuance of a permit pursuant to this application, nor the review or acceptance of plans, specifications, or drawings or the conduct of inspections by the District of Summerland constitutes a representation, warranty, or assurance that the work authorized by the permit complies with the BC Building Code, the Municipalities Building Bylaw, or any other applicable enactment, code or standard, or meets any standard of materials or construction.

In consideration of the granting of a permit pursuant to this application, I **release and indemnify** the District of Summerland, its Councilors, officers and employees from and against any liability, demands, claims, causes of action, suits, judgments, losses, damages, costs and expenses of whatever kind which I or any other person, partnership or corporation or our respective heirs, successors, administrators or assignees may have or incur, in consequences of or incidental to the granting of the permit or any representation, advice, certification, inspection, approval, enforcement or failure to enforce the BC Building Code or the District's Building Bylaw in respect of the work authorized by the permit, and agree that the Municipality owes me no duty of care in respect of these matters.
