Development Application Activity Summary

The number of planning applications has increased in the months of April and May, with a total of 9 new land use applications submitted over the two-month period. However, in comparison to the same time period for the year-to-date in 2022, the total number of rezoning applications (14) and development permits (10) are down. Development variance permits are consistent, with a total of 12 DVPs submitted in both years.

*Note: Annual construction values may vary from published reports. The information contained above provides Actual values at year end. Previous reports may have included construction values for permits that were issued but not collected by the applicant or commenced construction before year end.

April and May saw an uptick in construction value for both months, with a 12 unit multi-family (4 buildings, three units each) approved on Elliot Street in May for a total construction value of \$4 million. Total construction value for the year is up to \$18.34 million which is on average for the previous 5 years. The total number of building permits issued to the end of May are slower than that of the previous year. January and February were slower months in 2023 in comparison to 2022, but recent months have seen the normal range of building permits issued per month (15 – 20).

The District's Development Services department is now at full complement with the hiring of a second Building Official - Demitri Hofer in May. Demitri will help improved our permit timelines and is taking some files that were previously sent to the City of Penticton for review under contract.
