DP – Development Permit	OCP – Official Community Plan	AIA – Archeological Impact Assessment

Development Services Department Summary

The Development Services Department carries a significant and diverse workload that extends beyond the processing of planning and building applications. Staff are also responsible for a broad range of operational and administrative duties such as responding to inquiries through front counter, email, and phone; providing property information requests; notification for applications; and reviewing sign and business licence applications for land use and building compliance.

The Department also leads and supports public engagement initiatives and provides committee liaison services, for four Committees (Agricultural Advisory Committee, Advisory Planning Commission, Development Process Improvement Advisory Committee, and the Community Climate Action Advisory Committee). Duties include agenda preparation, minute taking, meeting administration, officiating, and attendance at Council meetings to present reports and provide professional planning advice. Ongoing responsibilities further include bylaw review and housekeeping to ensure regulatory alignment and compliance, as well as the preparation and administration of grant funding applications.

Planning Applications in Progress

The Development Services Department has several applications in progress. For a full list of these see Attachment 1.

As shown in Table 2 and Figure 1, development applications were down in 2025 compared to the previous four years. To date in 2026, rezoning applications are continuing to increase showing positive signs of future development to come. At the mid-point of 2026, application numbers are presenting themselves at last years rate.

Major Policy Planning Projects

In 2025, the Development Services Department launched the first of four phases of an update to the Official Community Plan (OCP) with Urban Systems (project consultant). The year saw community visioning, urban growth boundary analyses, and engagement to review draft OCP content. The final draft of the OCP went to Committees of Council in January, Committee of the Whole on February 10, 2026, and first reading on March 3, 2026. The OCP was read a second time on May 26, 2026 and was adopted on June 16, 2026. The department is now identifying proposed changes to the Zoning Bylaw which will be brought forward at a future date for consideration.

The District of Summerland is updating its Development Cost Charges (DCCs) Bylaw and considering the potential for an Amenity Cost Charge (ACC) Bylaw. DCCs and ACCs are fees that are collected from land developers and builders when they create new lots and construct new buildings that put an increased demand on infrastructure. These fees help fund the infrastructure and amenity upgrades needed to support growth, such as improvements to roads, parks, water systems, storm drainage, sewer, and community amenities. The DCC and ACC bylaw engagement results were presented to Council on May 26, 2026 and Council directed staff to proceed to readings of the DCC bylaw only for the June 16, 2026 meeting. The DCC bylaw has since been approved by the Inspector of Municipalities and is being considered for adoption on July 28th, 2026. The DCC Bylaw will come into effect on January 1st, 2027.

Additionally, the department has been working on submission of the LGCAP reporting for 2025 which is due on July 31, 2026. The department has also initiated the Climate Adaptation Plan project which will include engagement with stakeholders and will be wrapping up in the second half of 2027. Staff continue to work with the province to help develop the Building Permit Hub.

The District was also successful in obtaining the LGDAP grant for \$200,000 which will go towards development application process reviews and a Zoning Bylaw review in effort to streamline development applications in Summerland.

Building Summary

The District of Summerland issued sixteen (18) building permits in June 2026 worth a total construction value of \$2,756,000.00 (see Table 3). As shown in Figure 2, June 2026 building permit numbers are at a high since 2023 but relatively similar to the past 5 years while values for those permits remained low and smaller in scale of construction.
